History Early history (1918-41) The United States biological weapons program officially began in spring 1943 on orders from U.S. President Franklin Roosevelt. Research continued following World War II as the U.S. built up a large stockpile of biological agents and weapons. Over the course of its 27-year history, the program weaponized and stockpiled the following seven bio-agents (and pursued ...

The following list contains more than 300 easy-to-read titles covering organic production, livestock, horticultural crops, business and marketing, farm energy, water and pest management and more.

### **ATTRA | National Sustainable Agriculture Information**

Overview. NIOSH conducts research on engineering control solutions for reducing exposures to air contaminants and on physical hazards such as noise and non-ionizing radiation. The engineering control research focuses on identifying, developing, and assessing practical, solutions-oriented interventions that reduce occupational exposures to air contaminants.
