Design Traffic Forecasting Manual - Welcome to The GDOT

Annual average daily traffic, abbreviated AADT, is a measure used primarily in transportation planning, transportation engineering and retail location selection. Traditionally, it is the total volume of vehicle traffic of a highway or road for a year divided by 365 days. AADT is a simple, but useful, measurement of how busy the road is.

Annual average daily traffic - Wikipedia

Note: Effective June 26, 2006, the Flexible Pavement Rehabilitation Manual (FPRM) has been discontinued and can no longer be used for designing pavement structures on California state pavements. Information related to flexible pavement rehabilitation design is found in the California Highway Design Manual, Chapter 630, Topic 635, and California Test Method 356.

Reclaimed Asphalt Pavement (RAP) - apa-mi.org

A road surface or pavement is the durable surface material laid down on an area intended to sustain vehicular or foot traffic, such as a road or walkway. In the past, gravel road surfaces, cobblestone and granite

setts were extensively used, but these surfaces have mostly been replaced by asphalt or concrete laid on a compacted base course. Road surfaces are frequently marked to guide traffic.
