### **Absciscic Acid (ABA): Discovery, Quantitation and Functions**

Absciscic acid (ABA) is a key phytohormone that modulates plant growth and development as well as abiotic and biotic stress responses (Verslues and Zhu, 2007). ABA accumulates in the developing embryo and regulates seed development, seed maturation, and seed dormancy (Verslues and Zhu, 2007). ABA functions through complex signaling networks, some components of which have been identified.
