ACWI Organization Chart. ACWI Subgroup Contacts. GSA/FACA Advisory Committee on Water Information
The ACWI represents the interests of water-information users and professionals in advising the Federal Government on Federal water-information programs and their effectiveness in meeting the Nation's water-information needs.

Advisory Committee on Water Information - ACWI

About this journal. Advances in Mechanical Engineering (AIME) is a JCR Ranked, peer-reviewed, open access journal which publishes a wide range of original research and review articles. The journal Editorial Board welcomes manuscripts in both fundamental and applied research areas, and encourages submissions which contribute novel and innovative insights to the field of mechanical engineering.

Advances in Mechanical Engineering: SAGE Journals

NH₃ formation in a plasma electrolytic system. The synthesis of NH₃ from N₂ and water was carried out in a plasma electrolytic system schematically depicted in Fig. 1A. The setup bears similarity to electrochemical approaches except that the metal cathode was replaced by a plasma formed in a gas gap between a stainless steel nozzle and the solution surface.

Catalyst-free, highly selective synthesis of ammonia from

10th WORLD CONGRESS OF EWRA on Water Resources and Environment – Panta Rhei – 5-9 July 2017, Athens (Greece) Announcement . As known, all the papers presented at the 10th World Congress of EWRA will appear in the Proceedings which will be published as special issues of the journal EUROPEAN WATER.

European Water Resources Association - EWRA

Our study of hydraulic fracturing and its potential impact on drinking water resources: We studied the relationship between hydraulic fracturing for oil and natural gas and drinking water resources. The study includes a review of published literature, analysis of existing data, scenario evaluation and modeling, laboratory studies, and case studies.

Unconventional Oil and Natural Gas Development | US EPA

Water conservation includes all the policies, strategies and activities to sustainably manage the natural resource of fresh water, to protect the hydrosphere, and to meet the current and future human demand. Population, household size, and growth and affluence all affect how much water is used. Factors such as climate change have increased pressures on natural water resources especially in ...

Water conservation - Wikipedia

Water resource management is the activity of planning, developing, distributing and managing the optimum use of water resources. It is a sub-set of water cycle management. Ideally, water resource management planning has regard to all the competing demands for water and seeks to allocate water on an equitable basis to satisfy all uses and demands. As with other resource management, this is rarely ...

About Unconventional Energy Resources. Unconventional oil and gas is differentiated from conventional hydrocarbon resources based on the state of the hydrocarbon, nature of the geologic reservoirs and the types of technologies required to extract the hydrocarbon.

Unconventional Energy Resources

Water is the front-line for climate change and the sector most often mentioned for adaptation actions in developing countries' NDCs. 12 Climate-change impacts affect the water cycle primarily on four fronts, amplifying existing challenges. First, climate change affects availability: less water for some and more for others.
