In Euclidean geometry. An algebraic curve in the Euclidean plane is the set of the points whose coordinates are the solutions of a bivariate polynomial equation  $p(x, y) = 0$ . This equation is often called the implicit equation of the curve, in contrast to the curves that are the graph of a function defining explicitly  $y$  as a function of  $x$ . With a curve given by such an implicit equation, the ...

Algebraic number theory is a branch of number theory that uses the techniques of abstract algebra to study the integers, rational numbers, and their generalizations. Number-theoretic questions are expressed in terms of properties of algebraic objects such as algebraic number fields and their rings of integers, finite fields, and function fields. These properties, such as whether a ring admits ...

Algebraic Topology. This book, published in 2002, is a beginning graduate-level textbook on algebraic topology from a fairly classical point of view.

I'm a sophomore at MIT, majoring in math (course 18) and physics (course 8). I'm broadly interested in chromatic homotopy theory and arithmetic geometry, but my interests are constantly changing. Equivariant versions of Wood's theorem. Last update: July 2018. Proves using derived algebraic geometry ...

ICME-13. The Society of Didactics of Mathematics (Gesellschaft für Didaktik der Mathematik - GDM) has the pleasure of hosting ICME-13 in 2016 in Germany. The congress will be held under the auspices of the International Commission on Mathematical Instruction and will take place at the University of Hamburg from Sunday, 24 th July to Sunday, 31 st July 2016.

The Ramsey number  $R(m,n)$  gives the solution to the party problem, which asks the minimum number of guests  $R(m,n)$  that must be invited so that at least  $m$  will know each other or at least  $n$  will not know each other. In the language of graph theory, the Ramsey number is the minimum number of vertices  $v=R(m,n)$  such that all undirected simple graphs of order  $v$  contain a clique of order  $m$  or an ...
