In science, a multiple is the product of any quantity and an integer. In other words, for the quantities  $a$  and  $b$ , we say that  $b$  is a multiple of  $a$  if  $b = na$  for some integer  $n$ , which is called the multiplier. If  $a$  is not zero, this is equivalent to saying that  $b/a$  is an integer.. In mathematics, when  $a$  and  $b$  are both integers, and  $b$  is a multiple of  $a$ , then  $a$  is called a divisor of  $b$ .

In mathematics, and more specifically in graph theory, a graph is a structure amounting to a set of objects in which some pairs of the objects are in some sense "related". The objects correspond to mathematical abstractions called vertices (also called nodes or points) and each of the related pairs of vertices is called an edge (also called an arc or line).

Teachers often find it difficult to integrate writing and mathematics while honoring the integrity of both disciplines. In this article, the authors present two levels of integration that teachers may use as a starting point. The first level, writing without revision, can be worked into mathematics instruction quickly and readily. The second level, writing with revision, may
