

diseases of nematodes pdf

Nematodes feed on other microorganisms and plants like bacteriovores, fungivores, omnivores, predators, and plant parasites. Some, however, are serious human, animal and plant pathogens. Those that attack animals or humans do not attack plants and vice versa. Heartworm in dogs and cats is an example of nematode diseases in animals and people.

Nematode Diseases of Plants | Ohioline

diseases caused by bacteria, viruses and nematodes, and to provide guidelines for their management. Chemical control strategies that may be required are updated annually in the OSU Extension Agents'™ Handbook of Insect, Plant Disease and Weed Control (Circular E-832). Bacterial Diseases Bacteria are microscopic, single-celled organisms Bacte.

6 " Diseases and Nematodes Rick Cartwright, Dave TeBeest and Terry Kirkpatrick Corn diseases are important yield-limiting factors in many production areas of the U.S.

6 " Diseases and Nematodes - uaex.edu

Plant disease - Nematode diseases: Root-knot nematodes (Meloidogyne species) are well known because of the conspicuous "œknots,"• or gall-like swellings, they induce on roots. More than 2,000 kinds of higher plants are subject to their attack. Losses are often heavy, especially in warm regions with long growing seasons.

Plant disease - Nematode diseases | Britannica.com

Diseases and nematodes are most effectively managed by integrating several of the following practices: 1. Adapted, disease and nematode resistant cultivars - produce plants able to resist disease and nematode attack. Every variety has a disease and nematode resistance "œpackage"• that provides levels of resistance or tolerance to specific pests.

Disease and Nematode Management in Field Crops

3-2 Disease and Nematode Management in Field Crops: Corn and Sorghum 6. Good quality, disease-free seed - promote healthy, vigorous seedling development. In addition, some diseases can move in or on seed. Using clean, certified seed can help reduce the development of these diseases and maximize stands. 7.

Disease and Nematode Management - Delaware Soybeans

With the single exception of root-knot nematodes, which cause characteristic galling on plant roots (Figure 15.7), root-feeding nematodes do not cause specific symptoms. Stunting and chlorosis (yellowing) are the most common visible symptoms of nematode parasitism, but symptoms like these (Figure 15.8) may be caused by any number of factors.
