(PDF) Up, down, strange and charm quark masses with $N_f = 2$

quark masses have been performed with either two (up and down) [1, 2] or three (up, down and strange) [3]-[10] dynamical sea quarks. In this paper we present an accurate determination of the up, down, strange and charm quark masses using the gauge configurations produced by the European Twisted Mass (ETM) Collaboration with four

Up, down, strange and charm quark masses with $= 2+1+1$

The strange quark or s quark (from its symbol, s) is the third lightest of all quarks, a type of elementary particle. Strange quarks are found in subatomic particles called hadrons . Example of hadrons containing strange quarks include kaons (

Strange quark - Wikipedia

The problem isn't evident until a document is converted to (or exported as) Adobe's Portable Document Format (.pdf). Which is weird because the whole point (and appeal) of a PDF is: Preservation of the original appearance of a document. Meaning you can rest assured that people will see it exactly as you intended.
