electronic record. is any information that is recorded in machine readable form. 3. Electronic records include
numeric, graphic, audio, video, and textual information which is recorded or transmitted in analog or digital
form such as electronic spreadsheets, word processing files, databases, electronic mail, instant messages,
scanned images ...

Electronic Records and Records Management Practices

by an agency, regardless of media, physical form or characteristics. • Additional definitions are available in
the glossary under PUBLIC RECORDS and STATE RECORDS. You may consider the following records
management guidelines: • E-mail is a document created and transmitted as electronic information within
an electronic communication medium.

ELECTRONIC RECORDS MANAGEMENT HANDBOOK

Electronic Data Processing: Word Document or PDF? The whole process of working with electronic
documents can be divided into three basic stages – creation, transmission (delivery to designated
individuals, publications, etc.) and storage. For the first stage, the Word Document format has a definite
advantage.

law enforcement agents to understand how to obtain electronic evidence stored in computers. Electronic records such as computer network logs, email, word processing files, and image files increasingly provide the government with important (and sometimes essential) evidence in criminal cases. The purpose of

Searching and Seizing Computers and Obtaining Electronic

transmitting and retrieving information. Much of this electronic information is a record because it is used in state agencies to make decisions or affects citizens; therefore, it must be managed as a record. Though electronic information processing systems contain very important information, they do not perform electronic recordskeeping functions.

INTRODUCTION - California

Electronics is widely used in information processing, telecommunication, and signal processing. The ability of electronic devices to act as switches makes digital information-processing possible.
