general model of engineering problem-solving presented in various forms in many engineering textbooks. Our results suggest modifications to the engineering problem-solving model to make it more suitable for engineering students. 1. Introduction Solving open-ended problems is arguably the cornerstone of the engineering endeavor.

with computer software (e.g., MATLAB) to solve application problems. We assume that the students have no prior experience with MATLAB. The availability of technical computing environment such as MATLAB is now reshaping the role and applications of computer laboratory projects to involve students in more intense problem-solving experience.
