Lattice Boltzmann Method for Fluid Simulations

This is the lattice Boltzmann method which has been extraordinarily successful for many applications including turbulence, multi-component and multi-phase flows as well as additional applications, including simulations of the Schrödinger equation.

A Practical Introduction to the Lattice Boltzmann Method

Lattice Boltzmann method (LBM) is a relatively new simulation technique for the modeling of complex fluid systems and has attracted interest from researchers in computational physics.

lattice boltzmann method fundamentals and engineering

This book is an introduction to the theory, practice, and implementation of the Lattice Boltzmann (LB) method, a powerful computational fluid dynamics method that is steadily gaining attention due to its simplicity, scalability, extensibility, and simple handling of complex geometries.

Lattice Boltzmann Method: Fundamentals and Engineering

The Lattice Boltzmann method discretizes this equation by limiting space to a lattice and the velocity space to a discrete set of microscopic velocities (i. e. $\hat{v}' = (\hat{v}'_x, \hat{v}'_y)$). The microscopic velocities in D2Q9, D3Q15, and D3Q19 for example are given as:

0 Lattice Boltzmann (or BGK) Methods 8 Particles only have a finite number of discrete velocity values v_i ($i=0,1,..,b$) The choice is not arbitrary! $\hat{v}' \in \mathcal{V}$ Satisfy foundational symmetry requirements (up to required orders)

Lattice Boltzmann Methods for Fluid Dynamics

The lattice Boltzmann method is a powerful technique for the computational modeling of a wide variety of complex fluid flow problems including single and multiphase flow in complex geometries. It is a discrete computational method based upon the Boltzmann equation.

Lattice Boltzmann Methods - NIST

The lattice Boltzmann method, a method based in kinetic theory and used for simulating fluid behaviour, is presented with particular regard to usage in acoustics.

(PDF) The lattice Boltzmann method: Fundamentals and acoustics

In the lattice Boltzmann method, particles transfer from site to site in an adopted lattice with the momentum exchanges at each site according to the collision dynamics. Hence, we first show some typical lattice models which are generally used in simulations based on this method.
